EC-604**B.E. VI Semester**

Examination, June 2016

Antenna and Wave Propagation**Time : Three Hours****Maximum Marks : 70**

- Note:** i) Answer five questions. In each question part A, B, C is compulsory and D part has internal choice.
- ii) All parts of each question are to be attempted at one place.
- iii) All questions carry equal marks, out of which part A and B (Max. 50 words) carry 2 marks, part C (Max. 100 words) carry 3 marks, part D (Max. 400 words) carry 7 marks.
- iv) Except numericals, Derivation, Design and Drawing etc.

Unit - I

- Define absolute potential of a point charge.
 - Define:
 - Electric dipole
 - Dipole moment
 - Prove, radiation resistance of halfwave dipole is 197Ω .
 - Derive the expression of power radiated by a current element.

OR

Explain the Application to short antennas.

Unit - II

- Define the power gain of an antenna.
 - Define and give the formula of directivity.
 - State and explain the Reciprocity Theorem.
 - What is the multiplication of patterns?

OR

What are the travelling wave antennas? Compare resonant and non resonant antennas.

Unit - III

- What do you understand by Dipole Antenna?
 - Draw the helical antenna and its radiation pattern. Name the various part of antenna.
 - Explain the NOTCH antenna.
 - What is Babinet's principles? What do you understand by complimentary antenna?

OR

Explain microstrip antennas and write down limitations of this antennas.

Unit - IV

- Define broadside and end fire arrays.
 - What is sum and difference patterns?
 - What do you mean by retarded potential explain in short?
 - Explain Dolph-Chebyshev array design method.

OR

Design a four element broadside array of $\lambda/2$ spacing between elements. The pattern is to be optimum with a side lobe level 19.1 db down the main lobe maximum.**Unit - V**

- Draw the diagram of ionospheric layers above earth with their respective heights.
 - What is critical frequency? Give formula.
 - Write short note on MUF.
 - Explain different mode of propagation of radio wave in short.

OR

What do you understand by duct propagation?
